*This declaration is not legally binding.*

Donate Your Energy is a new initiative to conserve energy for a secure future. It encourages people in companies to save energy whereby the company agrees to donate a proportion of the energy saved to good causes selected by staff.

Conserving energy is the single most important thing we can do to fight against climate change and reduce greenhouse gas emissions. By taking action in the workplace through Donate Your Energy, everybody can make a difference in reducing our environmental impact and contribute to a good cause at the same time.

Injustice, poverty, exclusion, disadvantage and disregard for nature also contribute to the inability of individuals and communities to respond positively to the challenges faced by society.

Donate Your Energy harnesses the power of the individual to achieve a combined effort in reducing energy waste and donates the savings to preferred causes. This provides people with the opportunity to contribute to both energy saving and good causes and ultimately work towards a sustainable future.

*Nobody made a greater mistake than he who did nothing because he could only do a little.*

Edmund Burke, 1774-80

Donate Your Energy is a scheme to motivate people to save energy in companies in four EU countries managed and supported by:
